DELIVERED FRESH.
NEVER FROZEN.
NO PRESERVATIVES.

Free of antibiotics or added hormones, our free-run chicken is grain-fed on local prairie farms and passed as fit for human consumption before arriving at our door fresh—never frozen and with no preservatives.

Caught wild from the icy depths of our northern lakes, Lake Whitefish is a member of the salmon family and contains more omega-3 fatty acids than pink salmon and three times more than any trout.

Native to Western Canada, Northern Walleye is caught-wild from the cold northern lakes of Alberta and Saskatchewan and delivered fresh. Noted for its lean, nutrient-rich flesh, Walleye is an excellent source of easily-digested protein.

The perfect protein, our Canada Grade A eggs are delivered to us fresh (never frozen, no preservatives) from Alberta's Prairie Farms.
