

PUPPY TRAINER

SUPER ABSORBENT TRAINING PADS

The Puppy Trainer training pads help your puppy to become toilet trained. They also provide an elimination area for indoor confined and ill grown dogs. The pads can also be used in dog crates and pet carriers.

ADVANTAGES OF PUPPY TRAINER PADS

Pad surface dry
in 30 seconds

Paws stay dry
and clean

Locks in moisture
and odour

HOW TO TRAIN YOUR PUPPY?

- 1) Place the tray with the pad where your pet feels most comfortable but away from pet bedding, food and water. Keep the tray in the same location so that your pet does not get confused. Place some Puppy Trainer scent (art. nr. 3238) on the pad to encourage your puppy to use the pad as a toilet area.
- 2) Right after your puppy has drunk or eaten, put the puppy on the toilet, until he/she has relieved himself/herself. Also if you notice that your pet is looking fidgety or restless, guide him or her immediately to the pad.
- 3) It's helpful to choose a word or command which your pet can associate with regular toilet habit. Give your puppy plenty of praise when the tray is used. Remember to train your puppy patiently.
- 4) In case of "accidents" scold your pet lovingly but firmly. Clean spot immediately to remove odour.
- 5) When your puppy has been using the pads regularly, which may take some weeks, gradually move them closer to the door and eventually outside to your chosen area, once your puppy is fully house trained. Replace the pad daily in case of 1 dog/puppy.
